

HOSE AND COUPLINGS

HOSE

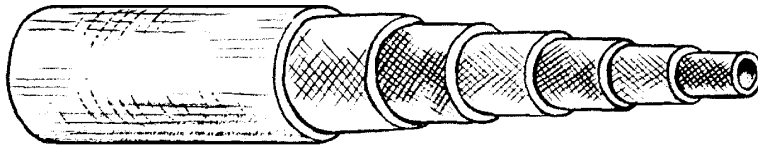

Single jacket hose

This type of hose has a rubber interliner with a single outer protective jacket.

Double jacket hose

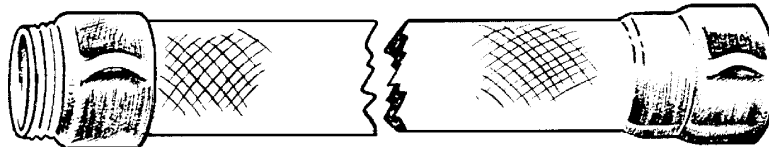

This type of hose has a rubber interliner with two outer protective jackets.

Booster hose

The booster hose is made up of several layers of hose material with an outer rubber covering

COUPLINGS

Male coupling

Female coupling

CDF uses swivel-type couplings with National Hose (NH) threads on hose equal to or greater than 1-1/2" inside diameter. National Pipe Straight hose (NPSH) threads are used where inside diameter is 1".
