

# Fire Protection Training

Procedures Handbook 4300

HOSE

**TOPIC:** How to Deploy The Triple Fold Load

**TIME FRAME:** 30 Minutes

**LEVEL OF INSTRUCTION:**

**BEHAVIORAL OBJECTIVE:**

*Condition:* A fire engine bedded with 150' attack line in a triple fold load and full structural protective clothing

*Behavior:* The firefighter will deploy the triple fold load under simulated fireground conditions.

*Standard:* With a minimum of 70% accuracy, within 90 seconds

**MATERIALS NEEDED:**

- A fire engine bedded with 150' of hose
- A nozzle
- A stop watch
- A performance examination

**REFERENCES:**

- IFSTA, Essentials of Fire Fighting, 2nd Edition, Chapter 10

**PREPARATION:**

The vast array of apparatus used by CDF, as well as cooperating agencies, makes it very likely that the firefighter will encounter many different hose loads. The triple fold load is a common load, and personnel should know how to deploy the triple fold. A disadvantage of the triple fold is that it must be fully extended before being charged.

TRIPLE FOLD LOAD

## OPERATIONS

## KEY POINTS

- | OPERATIONS                   | KEY POINTS   |
|------------------------------|--|
| 1. Face hose bed             | 1a. On running board or on tailboard   |
| 2. Pull hose                 | 2a. Out of bed<br>b. Approximately half way<br>c. Using nozzle and hose loop of top tier |
| 3. Turn around               | 3a. Facing away from hose bed  |
| 4. Place top tier and nozzle | 4a. On shoulder  |
| 5. Step from tailboard       | 5a. Carefully<br>b. Facing direction of travel   |
| 6. Walk away                 | 6a. From engine  |
| 7. Empty hose bed            | 7a. Of attack line   |
| 8. Ground hose               |  |
| 9. Advance nozzle            | 9a. To fire  |

HOW TO DEPLOY THE  
TRIPLE FOLD LOAD

## POINTS

### TIME START

- |    |  |           |
|----|--|-----------|
| 1. | Face hose bed while standing on tailboard or running board               | <u>10</u> |
| 2. | Pull hose and nozzle approximately half way out of hose bed              | <u>10</u> |
| 3. | Turn around placing back to hose bed                                     | <u>10</u> |
| 4. | Place top tier and nozzle on shoulder                                    | <u>20</u> |
| 5. | Step from tailboard facing direction of travel and walk away from engine | <u>20</u> |
| 6. | Pull all 150' of attack line from hose bed                               | <u>10</u> |
| 7. | Ground hose  | <u>10</u> |
| 8. | Advance nozzle to simulated fire   | <u>10</u> |
